

**CHIPPENHAM
TOWN COUNCIL**
Improving the quality of town life

Climate Emergency Advisory Group (CEAG)

Meeting 10 February 2020

Items on the agenda:

- Chippenham Area Board took place at Sheldon School on 3 February 2020. 134 individuals signed in and the exhibition space was full of local groups, including Chippenham Town Council and Chippenham Neighbourhood Plan. Zero Chippenham, who led the workshop at the Area Board meeting have an upcoming wash up of the meeting and the report will be fed back to the group.
- An update to the group on the two confirmed dates for primary school visits for the sustainability school events. Councillor Desna Allen will be attending in a Mayoral capacity.
- The next key step for baselining is for the Town Council Estate to achieve zero tonnes of CO2 emissions. It was highlighted that a clear plan would need to put into place to help achieve this including a mixture of smaller projects and larger, more time consuming projects that may take years to implement and successfully complete.
- Communication and Engagement was considered as it was highlighted to the group that it may not be seen that Chippenham Town Council are not doing enough in regards to the climate emergency and a communication plan may be appropriate and beneficial to the public. Agreed for more meetings to take place before we communicate agreed actions.
